White Spiret 300 Silicones Oil Emulsion (E 104 35%) 200 Antistatic Agent (Water soluble) 05 The above milky white emulsion is suitable for filling into trigger and aerosol packs

A Comprehensive Field Guide - Paint Protection

LACQUER 2K Air Dry Paint Preparation Carry out any repairs, making sure you do not overlap the body filler over the existing paintwork. Apply any rust spots with Ferrozone rust care, spot primer and bare metal with Javeli self-etch primer. Mixing ratio: 1 part etch primer, 1 part etch solution or for a small area use the "PRIME Clearcoat Primer - Paint system - Paint system - Paint system

OPTIONAL SUBLINE OPTIONAL SUBLINE How to refine plastics.

car door made from composite mater-ials is easily 10% lower than the weight of a traditional metal door This shows that plastics make an important contribution to reducing fuel consumption Rule of thumb: A 100 kg reduction in weight saves 1 litre of fuel over 100 km But plastics have even more advantages Due to the elasticity of the materials, for instance, minor damage is reduced

Basic Fiberglass Preparation Process Before Painting

Basic Fiberglass Preparation Process Before Painting. Fiberglass is a type of plastic that is impregnated with small glass fibers for reinforcement (it is also known as GFRP, for glass-reinforced plastic or FRP for fiberglass reinforced plastic) Fiberglass is lightweight, strong in both compression and tension, and easy to mold into intricate shapes. It was first introduced in the aircraft.
